

Amendments to the Specification:

Please replace the paragraph beginning on page 11, line 15, with the following rewritten paragraph:

Step S3: Upon receiving the operation instruction from the electronic camera 11, the MPU 24 judges the contents of the operation instruction. Here, when the contents are an operation instruction of imparting (or changing) attribute information to files in the flash memory 25, the operation of the MPU 24 proceeds to step S21. Alternatively, when the contents are an operation instruction of newly ~~recording~~ recording an image file newly photographed, the operation of the MPU 24 proceeds to step S4.

Please replace the paragraph beginning on page 13, line 25, with the following rewritten paragraph:

Step S15: When the wireless communication unit 14 is set to the “communication mode” in the above-described step S4, the MPU 24 imitates the recording operation of the CF card to the electronic camera 11 through the interface circuit 22 and the socket connector 21. Consequently, the electronic camera 11 sequentially transmits the files for recording to the wireless communication unit 14, assuming that it is a regular ~~recording~~ recording operation.
